

InfoValue *SimulcastTV*[™]

Digital Video Solution
for Large Venue Events

InfoValue SimulcastTV[™] is the state-of-the-art digital video solution for omnipresent capture and reproduction of large venue events from as many angles as desired. With precise synchronization of the high-definition, high-quality video from all cameras, the viewing of events in live or review modes is split-second accurate with no details missed.

InfoValue SimulcastTV[™] provides an unprecedented perspective on large venue events, creating benefits such as improving the effectiveness of After Action Reviews, preventing injuries and saving lives during training exercises, enhancing an organization's communications, and bolstering greater appreciation of entertainment extravaganzas.

With InfoValue SimulcastTV[™], the entire system can be controlled from a user-friendly console and/or seamlessly interfaced with additional expansion subsystems. There is no more need for imprecise and unreliable VHS tape decks or any standalone recording devices. With real-time streaming functionality, all capabilities can be extended to observers and/or participants at remote locations.

InfoValue SimulcastTV[™] has proven its rock-solid reliability and robustness in the most demanding applications. The U.S. Army has used InfoValue SimulcastTV[™] for After Action Reviews of vignettes at its Military Operations in Urban Terrain facility, and the U.S. Air Force for precision formation flight simulations of fighter jets in Mission Training Centers.

▼ InfoValue SimulcastTV[™] Advantages
