

SuiteTV Is Chosen As The Standard Product by Shangri-La
High Quality, Multifunctional and Fully Interactive In-Room Entertainment Solution
Create The Luxurious And Unique Service For Hotels

The Background:

Shangri-La Hotels are five-star hotels primarily located in main city across Asia and the Middle East; with future, starting expand to North America and Europe.

Business and leisure travellers from around the world stay with Shangri-La to enjoy their premium services.

The Challenge:

Combine the state-of-the-art IPTV system and the Shangri-La's deluxe service. Create a high-quality, multifunctional, handy and featured in-room digital entertainment solution. Provide guests the warmest and the most unique service from Shangri-La.

The InfoValue Solution:

InfoValue SuiteTV™ is chosen as the standard product by Shangri-La of North America. InfoValue SuiteTV solution offers guests in-room high definition interface and Video-On-Demand (VOD), a fully interactive IPTV, rich hotel information, and digital moods of Shangri-La own style. It helps the in-room TV become a perfect portal between hotel and guests.

SuiteTV has all features from InfoValue's industry leading IPTV and streaming platform to ensure seamless integration, 24x7 reliability, unlimited scalability and open architecture for future expansions.

The Epilogue:

InfoValue successfully deployed two newly opened hotels, Shangri-La Tokyo and Shangri-La Vancouver. These two deployments established a new target in Asian and North America, at the same time, these two hotels set up a new pattern of in-room entertainment for Shangri-La.

InfoValue SuiteTV could be used in hospitality field such as hospital, dorm, community and more.
