

**State-of-the-art legislative meeting system with
live multicast, recording, instant replay and on-demand playback**

The Background:

The Legislative Yuan is the highest legislative body in the Republic of China. There are currently 225 representatives and more than 3,000 staff members.

The Challenge:

Devising a powerful information technology environment to foster communications in the legislative process by documenting proceedings occurring simultaneously in all meeting rooms and sharing the details with all members, their staffs and the media.

The InfoValue Solution:

The InfoValue tightly integrated system is a state-of-the-art digital video streaming solution that broadcasts, records, and streams on-demand high quality video of all meetings. Now representatives, staff members and media can instantly access whatever they need, live or post session playback, from more than 3000 PCs, TVs and kiosks located throughout the Parliament complex.

All view, search and playback functions are simple to use and enhance automation of congressional procedures such as minute taking.

The system features InfoValue QuickVideo™ servers, InfoValue's award winning and performance leading streaming platform.

The Epilogue:

Today the 225 members of the Legislative Yuan and their more than 3,000 staff members rely on the InfoValue solution to record and disseminate official proceedings in many interactive and on-demand manners to greatly improve the communication in the daily workings of the body.
