InfoValue to Showcase SuiteTV Mobile Application, and Smart TV Integration at HITEC 2013

InfoValue Computing, Inc. (InfoValue), IPTV experts, will be exhibiting this June 25th-27th at the Hospitality Industry Technology Exposition & Conference (HITEC), and will showcase new features, including SuiteTV and Smart TV integration, and SuiteTV Mobile Application.

“We are very excited about these new additions to our already vast feature set,” said Monsong Chen, President & CEO of InfoValue. “We firmly believe that hotels using our SuiteTV system with these new advanced features will be able to easily increase revenue and decrease operational costs.”

The SuiteTV Mobile Application, available for free in the Apple App Store and the Google Play Store, provides a comprehensive multi-screen experience to the guest, and allows them to use their smartphones and tablets to view content such as hotel information, folio review, TV listing and programs, and Video-On-Demand content.

The SuiteTV and Smart TV integration, presently include new Hospitality Smart TV's from Samsung and LG, eliminates the need for set top boxes in guest rooms and provides a huge savings in system cost. Additionally, the absence of a set top box in the rooms means that there is one less piece of equipment the hotel staff needs to manage, maintain, and support, which will reduce operational costs.

InfoValue SuiteTV is the leader in IPTV solutions for the hospitality industry. InfoValue SuiteTV offers personalized guest services ranging from high-quality HDTV VOD to network-based personal video recording (nPVR) and time-shifted television (TSTV). By leveraging the award-winning InfoValue QuickVideo™ platform, InfoValue SuiteTV is uniquely positioned to support hotels in incorporating “quadruple play” services — delivery of TV, video, voice, and data — into their own service and information portal over the converged IP network infrastructure so they may simultaneously generate new revenues, increase occupancy rates, and reduce operational expenses.

About InfoValue

Founded in 1994 and experts in providing comprehensive IPTV platforms and solutions, InfoValue is recognized for innovations and advances in IPTV technology that has set the pace in performance, scalability and intelligence. InfoValue QuickVideo™ IPTV platform is based on a standards-compliant, open architecture that is optimized with innovative, patented technologies. InfoValue QuickVideo™, which is currently being used by telecommunication carriers, corporations, governments, educational institutions, hospitality providers, and broadcasters around the world, offers interactive video-on-demand and video multicast capabilities, as well as integrated video indexing, distributed video caching, server clustering, and video service management capabilities. InfoValue delivers turnkey IPTV solutions for specific industries, including InfoValue SuiteTV™ for hospitality, InfoValue BizTV™ for training and communications, and InfoValue NextGenTV™ for residential IPTV.
