InfoValue Announces Delivery of IPTV Emergency Channel Tuning V2

Instant dissemination of accurate and time sensitive emergency messaging to IPTV endpoints

ELMSFORD, N.Y. – June 2nd, 2017 – InfoValue Computing, Inc. (“InfoValue”), IP Media Experts, today announced the delivery of its IPTV Emergency Channel Tuning (“ECT”) Version 2 (“V2”), adding significant enhancements in messaging precision and efficiency over ECT’s proven capability of instant dissemination of time sensitive emergency messaging to IPTV endpoints (“TVs”), including smart TVs and set-top boxes.

When activated, ECT turns on TVs, if needed, tunes TVs to show the assigned messages, and, if appropriate, locks down TVs. Different messages can be shown on different TVs at the same time. For example, when facing a tornado, the messages to TVs in buildings near beach are to leave for inland buildings and the messages to TVs in inland buildings are to stay inside their buildings. Different messages can be shown for different types of emergencies.

“This new version significantly expands ECT’s messaging flexibility and accuracy, and simultaneously makes ECT easy to use,” said Dr. Monsong Chen, president and CEO of InfoValue. “The original ECT is in operation in large scale, mission critical deployments for many years. This V2 is suitable for deployments of any scale and any type, assisting the operators in coping with increasingly more complicated scenarios.”

Administrators and operators perform all specifications and activations via the secured ECT Console, which runs on most browsers on Windows & Mac PCs and iOS & Android tablets and smartphones.

InfoValue’s ECT feature is available now from InfoValue at 914-345-5980 (www.infovalue.com) or InfoValue resellers.

About InfoValue

Founded in 1994 and experts in providing comprehensive and premium IP Media platforms and solutions, InfoValue is recognized for innovations and advances in IPTV technology that has set the pace in performance, scalability and intelligence.
